One EPA Web - met with Patti to discuss the formal request to HQ to move our content to W3. Patti is working on this request and will send it to me and Bill G. to shepherd through Serena, who I believe is our Senior Information Officer, so she needs to send in the request.

One EPA Web - OWL call - I was on the call for the first 30 minutes, not too much new - lots of people out on vacation so we are at a bit of a standstill on the public notices effort.

One EPA Web – Enforcement - Checked in again with Nick Conger about whether or not Cynthia was going to direct the regions to present enforcement content online in a consistent/coordinated fashion. He responded this time! He said that she supports the idea of “creating a single database that houses all enforcement announcements, across all regions and HQ.” Stacy Murphy was in the email chain and suggested that this proposal be put on the agenda for the next enforcement coordinators meeting. I shared this information with our own regional enforcement managers and staff who have been tracking the One EPA web progress.

Gold King Mine - the HQ page was published and we are linking to it from our News and Events page.

Social on Gold King Mine spill, per hq, exact text as approved by attorneys.

R9 Communications messages - sent out a couple of these, consulted with Bill K. on the Deputy Regional Counsel message, and reviewed the earthquake “posters” to go on the hall monitors.

Started pulling together the August newsletter content.
